PROFESSIONAL SUMMARY

Computer Engineering graduate (2026) skilled in Core Java, OOP, Collections, Multithreading, Exception Handling, SQL, DBMS and DSA. Certified in Java Programming with DSA (Core2Web). Built cross-platform mobile apps using Flutter, Dart and Firebase, with REST API integration and JDBC database connectivity. Completed a Flutter Developer internship delivering production-ready UI screens. Strong problem-solver seeking an entry-level Software Developer / Java Developer role.

KEY EXPERTISE

Languages	Java, SQL, Dart
Frameworks	Flutter
Databases	SQL, DBMS
Tools	Git, GitHub, Linux
Core Concepts	OOP, Collections, Multithreading, Exception Handling, Data Structures & Algorithms (DSA), SDLC, Version Control

EDUCATION

B.E. – Computer Engineering, SPPU | CGPA: 7.95/10 | 2022 – 2026 (Completed)

12th (HSC), MSBSHSE | Percentage: 91.33% | 2021

10th, CBSE | Percentage: 87.60% | 2019

INTERNSHIP

Flutter Developer Intern, Incubator Systems Pvt Ltd. Jan 2025 – Feb 2025

- Developed responsive, pixel-perfect UI screens from Figma designs using Flutter.
- Built multiple reusable widgets and implemented clean, maintainable UI components.
- Strengthened core concepts such as navigation, state management, API integration and local storage through hands-on Flutter application development.
- Gained practical experience in debugging and cross-platform application development.

PROJECTS

TravelSync – Travel Planning Mobile Application

Key Skills: Flutter | Dart | Firebase | Shared Preferences | State Management

- Developed a cross-platform mobile application using Flutter for collaborative trip planning, with Firebase Authentication and cloud storage.
- Integrated a real-time database so multiple users could co-plan trips simultaneously.
- Used Shared Preferences for offline data access, improving app reliability.

Library Management System – Console-Based Java Application

Key Skills: Java | OOP | Collections | Exception Handling | SQL | DBMS (JDBC)

- Built a console-based Library Management System in core Java applying OOP principles (Inheritance, Encapsulation, Polymorphism).
- Used the Collections framework (ArrayList, HashMap) and JDBC connectivity to a MySQL database for CRUD operations — add, issue, return and search books.
- Added exception handling for invalid inputs (e.g. duplicate book ID, unavailable book) to keep the application stable.

CERTIFICATIONS

Java Programming with DSA | Core2Web

KNOWN LANGUAGES

English, Hindi, Marathi
